# HISTORICAL INTRODUCTION[1]

Francis Poulenc first mentioned that he was writing a flute sonata in a letter to his friend, the baritone Pierre Bernac, dated 2 September [1952] in which he remarked, 'Momentarily I have abandoned the Sonata for Two Pianos for a Sonata for Flute which suddenly took shape at the Austerlitz station last Thursday.'[2] Confirmation of this was published in the October issue of *The Chesterian,* the official magazine of Chester Music, which stated: 'Francis Poulenc is at present writing a Sonata for Flute and Piano which, it is hoped, will be ready for publication early next year. The work is being specially composed for a well known American flautist, who will introduce it in the United States.'[3] Very possibly the 'well known American flautist' was Julius Baker, who at this time was about to leave his position as principal of the Chicago Symphony and return to New York for positions as a teacher at The Juilliard School and as a performer in the CBS Orchestra and the Bach Aria Group.[4] Three letters from Poulenc to his publisher R. Douglas Gibson at Chester indicate that he contemplated resuming the work over a period of years. In 1953 he wrote: 'I am just finishing my Sonata for Two Pianos. God knows if I will ever take up the Flute Sonata again because I am going to write a large opera for La Scala based on *The Dialogues of the Carmelites.*'[5] In 1955 he added, 'After the summer I hope to take up again my idea for a Sonata for Flute.' Finally, in early 1956, Poulenc wrote, 'Perhaps this summer I will finish the Sonata for Flute.'

It is not known if this 'early' sonata is directly related to the published sonata, but it is highly likely. In a letter dated 3 April 1956, Harold Spivacke, Chief of the Music Division of the Library of Congress acting in his joint capacity as spokesperson for the Coolidge Foundation at the Library of Congress, wrote to Poulenc offering a commission for a piece of chamber music for a festival to take place on 19–21 October 1956.[6] Although Spivacke proposed a piece for two pianos, he left Poulenc the option of a different sort of work providing it did not exceed six instruments. Poulenc responded in a letter dated 13 April [1956] declining the commission on the grounds that he was just finishing the orchestration of his opera and that the premiere in Milan was too close. Undeterred, Spivacke again offered the commission in a letter dated 9 May 1956. Poulenc delayed his response until August at which point he noted that his opera was in order and that he could now envision writing something. He suggested a Sonata for Flute and Piano, dedicated to the memory of Elizabeth Sprague Coolidge, and agreed to Spivacke's proposed terms of $750 and the gift of the original manuscript to the Library of Congress provided that he could reserve the premiere for the Strasbourg Festival in June 1957.

Apparently Jean-Pierre Rampal learned about the sonata in a phone call from Poulenc not long after the commission. In his autobiography Rampal recalled the occasion. 'Jean-Pierre,' said Poulenc: 'you know you've always wanted me to write a sonata for flute and piano? Well, I'm going to,' he said. 'And the best thing is that the Americans will pay for it! I've been commissioned by the Coolidge Foundation to write a chamber piece in memory of Elizabeth Coolidge. *I* never knew her, so I think the piece is yours.'[7]

Additional letters between Poulenc and Spivacke or his deputies consummated the agreement, and Poulenc wrote the work in Cannes, France between December of 1956 and March of 1957. In a letter to Bernac dated 8 March [1957], Poulenc called the Sonata a work with 'Debussyste' proportions. On 9 March 1957 Poulenc wrote to R. Douglas Gibson of his progress: 'The first two movements of the Sonata are complete. I am pleased with them. It is a question of an *Allegretto melancolico* and of a *Cantilena.* The finale will be an *Allegro giocoso.*' Poulenc must have completed the finale quickly, because on 7 June 1957, just eleven days before he and Rampal presented the world premiere at the Strasbourg Festival, he mailed the completed manuscript to the Library of Congress.[8] Initially Poulenc intended to come to the United States to perform the work at the Library and actually proposed a recital with the singer Alice Esty which would have included the second American performance of his song cycle *Le Travail du peintre.*[9] When he realized that this concert would be his only reason for

[8] The unofficial premiere was given on 17 June 1957. In Rampal's words: 'On the morning before the first performance, Poulenc called me. "Arthur Rubinstein is here," he said. "I've just talked to him, and he very much wants to hear my new sonata. The only trouble is, he has to leave tomorrow before the performance. Do you think you could come over right now and have just one more rehearsal?" "With pleasure," I replied. So the unofficial premiere . . . took place in a concert hall in Strasbourg with an audience of one — Arthur Rubinstein, sitting in the middle of the front row. The applause we received from him was as memorable as at any concert I have played.' See Rampal, *Music, My Love,* p. 128.

coming to America, he demurred and suggested that the American premiere be arranged with Rampal and his pianist Robert Veyron-Lacroix. The American premiere took place in the Coolidge Auditorium at the Library of Congress on 14 February 1958 and was, according to newspaper accounts and a letter from Spivacke to Poulenc, a rousing success.[10]

Between the world premiere and the American premiere Poulenc found time to introduce the sonata to the English-speaking world through the BBC, a forum he had used on numerous occasions dating back to the 1920s. On 16 January 1958 Poulenc played the work with the renowned English flutist Gareth Morris.[11] Since these early performances, and Poulenc was to give others before his death, the Sonata for Flute and Piano has become one of the most frequently-performed and well-loved flute sonatas in the entire repertoire.[12] In preparing this new edition, the editors hope not only to clarify many textual issues but also to supply sufficient documentation for those who wish to know more about the background of the work and the significant problems involved in editing it.

## THE SOURCES

The following sources, with their numerical sigla, have been used in preparing this new edition.

**1.** Autograph draft score (United States: New York City, Pierpont Morgan Library, Frederich R. Koch Foundation 639). This manuscript was given by Poulenc to his personal physician and bears the inscription in Poulenc's hand 'Pour mon ange / gardien, le cher / Docteur Chevalier / tendrement / Poulenc / [rule].' The manuscript is dated 'Majestic / Cannes / Décembre / 56' after movement 1 and 'Majestic / Cannes / Décembre [1956] / Mars 57' after movement 3. Companion to Source **3**.

**2.** Autograph presentation score (United States: Washington D.C., Library of Congress, ML29c. P78 no. 1 case). Sent by Poulenc on 7 June 1957 to satisfy terms of the Coolidge Foundation commission.

**3.** Autograph flute part (France: Private library of Jean-Pierre Rampal). Used in preparing for the first performance, 18 June 1957. Companion to Source **1**.

**4.** Copyist's flute part (Great Britain: Private library of Gareth Morris). Used for the first English performance on the BBC and inscribed to Morris by Poulenc on 16 Jan. 1958. This manuscript bears the inscription 'Pour Monsieur Morris / qui joue si merveilleusement / cette Sonate / avec un bien amical / merci. / Fr. Poulenc / [rule] / 16/1/58' and 'Day of the first *Carmélites* / performance', both in Poulenc's hand.

The so-called '16th edition', the most current at this writing, contains only the slightest variants when compared to the first edition, and does not represent, in the technical sense, a new edition. It is actually a photographic reprint with occasional minor alterations.

[10] See Day Thorpe's review in *The Evening* Star (Washington D.C.), 19 Feb. 1958 and Spivacke's letter of 24 Feb. 1958 in which he wrote: 'I am writing to tell you that the performance by Messrs. Rampal and Veyron-La Croix of your Sonata for Flute and Piano was a great success. The audience reaction was most enthusiastic, and I want you to know that we in the Music Division enjoyed it immensely.' A recording of this performance was sent to Poulenc with a copy retained by the Library of Congress.

[11] A tape of this performance, discarded by the BBC and now in the possession of M Morris, was consulted by the editors for this edition.

[12] For a detailed list of recordings including those by Poulenc, see Francine Bloch, *Phonographies Francis Poulenc 1928–1982* (Paris: Bibliothèque Nationale, 1984), pp. 186–90. See especially the two recordings made with Rampal in 1957 and 1959, and a third made at the Festival de Menton with Christian Lardé on 3 July 1962. In a letter to Gibson dated 14 Nov. [1957], Poulenc wrote of the first, 'I am happy to tell you that the recording of the Sonata for Flute [and Piano] is excellent.'

**Relationship of the Sources and Missing Sources**

In his autobiography, Jean-Pierre Rampal recounts that Poulenc, while in the midst of rehearsals for the Paris production of *Dialogues des Carmélites* (first given 18 June 1957), repeatedly summoned him to his 5 rue de Médicis apartment to play through the sonata as it grew.[13] Rampal makes clear that upon first sight: 'The first movement seemed disjointed, and there wasn't much of a theme or direction. The ideas came and went, but had no real coherence. And some of the fingering was impossible. I said so.' On a second occasion Rampal reported, 'I saw that his ideas were more coherent this time, but still far from finished.' Apparently Poulenc sent him off with some scraps of music to 'see if it's playable.' These meetings continued and Rampal noted: 'I did change a few phrases here and there and gave Francis some ideas as to how the work should hang together . . . but I simply couldn't see where the piece was going — and was very much afraid Francis couldn't either. Yet he became more confident, and slowly but surely the Sonata for Flute and Piano took its final shape.'

Unfortunately, none of the manuscript fragments referred to above by Rampal has survived, and the earliest known written record of the Sonata is the rough piano score which Poulenc marked 'monstre Brouillon' on the first page (Source **1**). This manuscript shows numerous signs of composition and clearly represents an early stage of the work in Poulenc's conception. It contains various cancelled measures, and the primary accompanimental figure in the first movement was to undergo considerable revision before the work was published.

The flute part in Poulenc's hand (Source **3**), which Rampal indicates was used to prepare for the Strasbourg premiere, follows Source **1** in many particulars (dynamics, written-out trills, octave transpositions, cancelled passages, location of rehearsal numbers, etc.). It would appear that Rampal made changes to this part probably while rehearsing with Poulenc for the premiere because his additions often revise details written by Poulenc. This part is not the one from which either Source 4 or the printed scores (Sources **5a**$^{s\&p}$ **& 5b**$^{s\&p}$) was copied.

The only manuscript fair copy of the work is Source **2**, the exemplar Poulenc sent to the Library of Congress to satisfy terms of the Coolidge commission. This manuscript is neatly written and generally free from errors, and it contains considerable revisions when compared to Sources **1** and **3**. Absolutely no markings appear on the manuscript which would indicate that it was ever used for performance, but it does contain some tiny notations in black pencil which are similar to those added by engravers as they plan the layout of each page during the process of engraving. Who made these markings and what they mean remains a mystery, but it can be stated unequivocally that this manuscript was not used in the engraving process. Moreover, the lack of performance markings is significant because it helps confirm that other manuscript scores existed which are now missing.

Source **4**, in the hand of Poulenc's professional copyist (Monsieur Gunst?)[14], was copied sometime later in 1957 and given by Poulenc to Gareth Morris in preparation for their BBC performance on 16 January 1958. Morris has recalled that Poulenc did not send him a piano score so that he had little conception of the Sonata at the time of first rehearsal with Poulenc. This, the earliest part containing metronome markings, is inscribed 'THE FLUTE PART HAS BEEN REVISED BY JEAN-PIERRE RAMPAL.' We know that this part was lent by Morris to Chester Music and that it was the principal source for the printed flute part (but probably not for the flute part printed in the piano score, which contains significant variants in phrasing).[15]

The preparation of the printed first edition (Source **5a**$^{s\&p}$) is the subject of considerable uncertainty. Although it was pointed out above that Source **4** was used to produce the printed flute part, Rampal has stated *emphatically* that he did *not* revise the flute part, as is indicated on the part. The statement was probably added by the copyist at Poulenc's direction as a gesture to Rampal for his collaboration during the genesis of the work.[16] Rampal has also stated that he had no contact with Chester concerning the part and noted the irony that his name was misspelled on the first edition.[17]

Precisely how the score was prepared is a complicated web to untangle. Three letters to R. Douglas Gibson from Poulenc mention his plans to transport a manuscript to London. In the first, received at Chester on 29 July 1957, Poulenc advised: 'I will bring you the score of my Sonata on the way to Edinburgh on 2 September.' In a second dated 23 August [1957], Poulenc wrote: 'I will bring to your establishment a *very clean* copy of the Sonata so that engraving it will not be difficult. Concerning the contract, nothing is pressing. I remind you that for this work I require the total sum of 250£.' Finally, in a third letter received by Chester on 30 August 1957, Poulenc wrote 'I will come by Chester Tuesday morning 3 September and bring you the manuscript of my Sonata for Flute.' Whatever manuscript Poulenc finally delivered to Chester has disappeared without a trace.'[18] Apparently the formal contract for the Sonata was signed later when Poulenc delivered his Elegy for Horn and Piano to Chester.[19] Many Poulenc manuscripts used as engraver's copies remain in the hands of his publishers, but in the last half decade of his life he habitually asked for their return, often presenting

[15] Many of these variants are catalogued in the two articles by Patricia Harper mentioned in footnote 1.

them to special friends or retaining them in his own personal collection.[20]

The next mention of the Sonata in Poulenc's correspondence occurs in a letter from Rome written on 27 January 1958. With it Poulenc returned the set of proofs saying: 'Here, *finally,* are the corrected proofs for the Sonata. One must make a second set that you will have *corrected very carefully* by a *specialist* in order to save time.' Poulenc then requested that a copy of the flute part be sent to him immediately suggesting that Gibson ask Gareth Morris for his part. Poulenc, who needed the part for a performance on the 12th [of February?], added that he would play the piano part from the first proofs if they could be returned to him after corrections had been made. The winter 1958 issue of *The Chesterian* advertised the Sonata as 'in the press' and that it would be 'ready Jan./Feb. 1958.'[21] By June the Sonata still had not been published, and Poulenc expressed his impatience to Gibson on 13 June: 'In effect, my dear Gibson, I do not understand at all the delay with the Sonata. I hope that we will have it soon because people are asking for it everywhere, month after month, all the more so because Rampal is going to promenade it around the world.'

Again we are frustrated by the fact that neither the first nor the second set of corrected proofs can be located and all that remains is a single uncorrected set for the flute part (Source **7b**). Poulenc is known to have worked directly on printed copies in making significant revisions to a few pieces and somewhat more frequently when revising old ones for new editions. Unfortunately, few proofsheets corrected by Poulenc have come to light, and it is suspected that the vast majority of them were simply discarded once the corrections were entered.[22] All that is known to remain of the entire printing process before the edition was published are the Gareth Morris part (Source **4**), several pages of Poulenc's corrections (Source **7a**), of a distinctly minor nature, and the uncorrected proofsheets for the flute part (Source **7b**).

## PROBLEMS OF AUTHORITY

In preparing the new edition of the Sonata for Flute and Piano, no single source could be used without careful consideration of the others. There are major differences between the presentation score (Source **2**) and the first printed edition (Source **5a**$^{s\&p}$). Some changes have also been introduced in later 'editions' (reprints) of the printed score and part (Source **5b**$^{s\&p}$). Moreover, the printed score and part contain many inconsistencies in phrasing and various errors of rhythm, pitch, articulation, dynamics, rehearsal numbers, etc. Source **2** has been used as the principal source, but given the fact that neither the manuscript sent to the engraver nor the corrected proofsheets can be located, various emendations have been made on the authority of the printed edition, especially when they are corroborated by Source **8a** (Poulenc's 1957 recording with Rampal), Source **8b** (Poulenc's 1958 recording with Morris), or Source **8c** (Poulenc's 1959 recording with Rampal). All such emendations have been logged in the critical report, and the source of the emendation and the reason for its acceptance discussed. Other variants are logged only if they have significance. In particular, where the old printed edition (Sources **5a**$^{s\&p}$ **& 5b**$^{s\&p}$) is at substantive variance with the new edition, the alternate reading in Sources **5a**$^{s\&p}$ **& 5b**$^{s\&p}$ has been logged.

## EDITORIAL CONVENTIONS

The following editorial conventions are observed. Emendations not found in the principal source (Source **2**) are placed in square brackets except for slurs, which contain a strike through the middle. Where Poulenc has provided alternate endings, written-out trills, or cancelled measures, these alternatives are noted, and some are printed as musical examples in the commentary. Measure numbers in italics are added to facilitate the reporting of variants; the rehearsal numbers are Poulenc's own. In reporting, the designation '4.3' indicates measure four, sign three. (Any note, tied note, or rest is considered to be a sign.) The designation '4.3/4 indicates measure four, between signs three and four. The following abbreviations occur: Fl (flute), Pn (piano), rh (right hand), and lh (left hand). All source numbers are printed in bold type. Pitches are noted according to the following system: CC C c $c^1$ [middle] $c^2$ $c^3$ $c^4$. Notational inconsistencies (directions of stemming and beaming, etc.) are normalized without comment.

[20] The *Elégie pour cor et piano,* for example was sold by Poulenc to the Library of Congress, 'Une Chanson de porcelaine', Improvisations 13–15, and *Laudes de Saint Antoine de Padoue* were presented to Madame Lambiotte, the *Elégie (en accords alternés) pour deux pianos* was presented to Christ Schung, *La Courte Paille* was given to Denise Duval, and the Sonatas for Oboe and Clarinet remained in Poulenc's own possession.

[21] See 32, no. 193 (winter 1958): inside rear cover.

[22] On rare occasions he presented proofsheets to such friends as Georges Auric and Nadia Boulanger, but several of Poulenc's publishers made a point of discarding the corrected proofs he returned, and Poulenc would have had to make a special effort to save them from the dustbin.

| Pn: 175.1–186.4 | cf. 71.1–82.4, the parallel passage, in which Poulenc marks the lh staccato |

Source **2** clearly replaces some staccato marks with tenutos, which have not been retained in the edition. Moreover, the articulation in the flute part in 200–201 differs from that in 9–11 & 24–25. |

| Fl: 207.3 | staccato added to agree with 16.3 and 31.3 |
| Pn: 207.4 | **5a$^{s}$ & 5b$^{s}$** give no change in dynamics |
| Pn: 208.2 (lh) | **2** gives d$^{1}$–e$^{1}$ both crotchets a seventh above the bass; emended on authority of **5a$^{s}$, 5b$^{s}$, & 8a** (cf. 17) |

| Pn: 218.1 (rh) | **5a$^{s}$ & 5b$^{s}$** lack d$^{2}$ flat & tenuto |
| Pn: 218.1–4 (lh) | **2** adds four quavers e flat-b-flat, d$^{1}$ flat-f$^{1}$ over the e flat minim |
| Pn: 219.1 | **5a$^{s}$ & 5b$^{s}$** give *'f'* (which is consistent with the Pn part) |
| Pn: 220.1 | **2** gives this an octave lower; emended on authority of **8a** |
